# 1. Executive Summary

---

**InfoGenie** is an AI-powered marketing intelligence and campaign automation platform that compresses the work of an entire growth team — competitive analyst, copywriter, media buyer, SEO strategist, and CRM operator — into one operator-grade application.

Built on a multi-LLM backbone (OpenAI GPT-4o, Anthropic Claude, Perplexity, Google Gemini, Cloudflare Workers AI) with 80+ feature tiers spanning competitive monitoring, ad generation, ad optimization, SEO, content, conversation inbox, and white-label reporting, InfoGenie is engineered as a "Brandwatch-killer + HubSpot Marketing-killer + Adcreative.ai-killer" suite at a fraction of the cost.

## Highlights

- **Dual-AI Attack Plan:** parallel GPT-4o + Claude analyses synthesised by a third LLM produce more reliable competitive intelligence than any single-vendor tool.
- **Real Data Discipline:** every analysis is sourced from live APIs (Meta Ad Library, DataForSEO, HubSpot, Firecrawl, GSC) — no synthetic placeholders.
- **Full Closed Loop:** Discover insight → generate counter-message (4 AIs in parallel) → schedule across 15 social platforms via Zernio → launch ads on Meta/Google/TikTok → optimize hourly via Multi-Armed Bandit → measure True ROAS.
- **Agentic Command Bar:** natural-language operation of the entire stack via GPT-4o function calling.

## Ask

**Seed round: USD 750,000** for 18 months of runway to reach 500 paying customers (USD 75K MRR / USD 900K ARR) and validate enterprise expansion.

## 2. Company & Product Overview

| Item         | Detail                                                                                |
|--------------|---------------------------------------------------------------------------------------|
| Legal entity | SureTrade (operating brand: InfoGenie)                                                |
| Founded      | 2025                                                                                  |
| Headquarters | South Africa (remote-first)                                                           |
| Stage        | Pre-seed → Seed (product live, early customers)                                       |
| Stack        | Node.js / Express · Vanilla JS SPA · PostgreSQL · 5 LLM providers · 15+ external APIs |
| Hosting      | Replit Deployments (auto-scale, TLS, custom domain)                                   |

### Mission

Give every founder, marketer, and agency a 24/7 AI growth team that out-thinks, out-writes, and out-spends their competitors — at 1/10th the cost of hiring or stitching together five SaaS tools.

### Vision

Become the operating system for performance marketing — the single pane of glass where insight, creative, distribution, and optimization happen autonomously.

## 3. Problem & Opportunity

### The pain

- The average growth team uses **9-14 disconnected tools** (SEMrush + Brandwatch + Hootsuite + AdCreative + HubSpot + Triple Whale + ...) costing USD 3K-10K / month.
- Insights live in one tool, creative in another, distribution in a third — handoffs lose 60%+ of intent.
- SMBs can't afford the stack; enterprises can't move fast enough through it.
- Most "AI marketing" tools are single-LLM wrappers with hallucination risk and no closed loop to action.

### The opportunity

- Global martech spend: **USD 215B** (2025) growing 13% YoY.
- AI in marketing TAM: **USD 47B by 2028** (CAGR 28%).
- SMB & agency segment underserved by enterprise tools — InfoGenie's sweet spot.

## 4. The InfoGenie Solution

---

One platform. 80+ tiered features. Five AI brains in parallel. Real data only.

### Core capability pillars

| Pillar                 | What it does                                                                                    | Replaces                                 |
|------------------------|-------------------------------------------------------------------------------------------------|------------------------------------------|
| Marketing Intelligence | Competitor analysis, keyword gap, share of voice, win/loss intel, predictive moves              | SEMrush, Brandwatch, SimilarWeb          |
| Campaign Automation    | AI creative generation, multi-channel ad hub, social calendar, drip engine, re-engagement agent | AdCreative.ai, Hootsuite, ActiveCampaign |
| SEO & Content          | Content-gap, internal-link suggester, CRO Lab, on-page audit, multi-page crawler, GEO audit     | Surfer SEO, Clearscope, Screaming Frog   |
| Analytics & Reporting  | Cross-channel reports, Attribution & ROI, True ROAS, Goal-Based Autonomous Monitoring           | Triple Whale, Northbeam, Looker Studio   |
| Lead & Conversation    | Lead Qualifier Agent, Lookalike Builder, Unified Conversation Inbox                             | Drift, HubSpot Conversations             |
| Real-time Monitoring   | Mention tracking with sentiment, real-time alerts, webhook channels                             | Mention.com, Brand24                     |

### Architectural moats

- **Dual-AI synthesis** — GPT-4o + Claude run in parallel; a third LLM blends → reduces hallucinations vs single-LLM peers.
- **Atomic + mutex persistence** — bank-grade data integrity for campaigns and audiences.
- **Multi-Armed Bandit optimizer** — autonomous budget reallocation on Meta & Google.
- **Dynamic Audiences** — rule-based real-time segments, mirrored to HubSpot, with churn-risk auto-win-back drips.
- **Agentic command bar** — natural-language control of the entire stack.

# 5. Market & Customer

## Ideal Customer Profile

| Segment                   | Profile                                               | Annual willingness-to-pay |
|---------------------------|-------------------------------------------------------|---------------------------|
| Solo founder / Indie SaaS | 1-5 employees, USD 0-500K ARR, DIY marketing          | USD 600 - 1,200           |
| SMB & eCom brand          | 5-50 employees, USD 1M-20M revenue, in-house marketer | USD 3,600 - 9,600         |
| Performance agency        | 5-50 staff, 10-80 client accounts, multi-tenant needs | USD 12,000 - 36,000       |
| Mid-market brand          | USD 20M-250M revenue, 2-8 person growth team          | USD 24,000 - 60,000       |

## TAM / SAM / SOM

|            | Definition                                         | Size        |
|------------|----------------------------------------------------|-------------|
| TAM        | Global martech / SaaS marketing tools              | USD 215B    |
| SAM        | SMB + Agency segment, English-speaking, AI-curious | USD 18B     |
| SOM (3 yr) | Realistic capture given GTM plan                   | USD 18M ARR |

## 6. Competitive Landscape

| Competitor            | Strength                             | Weakness InfoGenie exploits                              |
|-----------------------|--------------------------------------|----------------------------------------------------------|
| HubSpot Marketing Hub | Brand, CRM tie-in                    | Expensive, no real competitive intel, single-LLM AI      |
| SEMrush / Ahrefs      | Keyword data depth                   | Insight only — no creative, no ad launch, no closed loop |
| Brandwatch            | Social listening at enterprise scale | USD 800+/mo, no creative or campaign automation          |
| AdCreative.ai         | Ad asset generation                  | Single-vendor AI, no intelligence layer, no optimization |
| Triple Whale          | eCom attribution                     | Reporting only, no creative or competitive intel         |
| Jasper / Copy.ai      | Copy generation                      | No data sourcing, no campaign launch, no optimizer       |

**InfoGenie's wedge:** the only platform that closes the loop from *competitive insight* → *multi-AI counter-creative* → *cross-platform launch* → *autonomous optimization* → *True ROAS*, all under one login.

## 7. Business Model & Pricing

---

### Subscription tiers (USD / month, billed annually)

| Plan       | Price                 | Target                    | Included                                                                         |
|------------|-----------------------|---------------------------|----------------------------------------------------------------------------------|
| Starter    | \$49                  | Solo founders             | 3 competitors · 500 AI runs · 1 brand · core SEO + ads                           |
| Growth     | \$199                 | SMBs / in-house marketers | 10 competitors · 5K AI runs · 3 brands · ad optimizer · drips                    |
| Agency     | \$599                 | Performance agencies      | Unlimited competitors · 25K AI runs · 25 client workspaces · white-label reports |
| Enterprise | Custom (from \$2,500) | Mid-market brands         | SSO · custom integrations · dedicated CSM · SLA · on-prem LLM option             |

### Revenue mix (Year 3 target)

- Subscription: 88% (annual prepay default = strong cash flow)
- Usage overage (LLM credits beyond plan): 7%
- Services / onboarding (Enterprise): 5%

### Unit economics target (Year 2)

|                                          |                            |
|------------------------------------------|----------------------------|
| Average revenue / account / month (ARPA) | USD 165                    |
| Gross margin                             | 72% (after LLM & API COGS) |
| CAC (blended)                            | USD 220                    |
| Payback period                           | 1.9 months                 |
| Net revenue retention                    | 112%                       |
| LTV / CAC                                | 9.4×                       |

## 8. Go-to-Market Strategy

---

### **Phase 1 (Months 0-6) — Founder-led, content-led**

- Content engine: 4 SEO-optimized articles / week using InfoGenie's own Content Scorer (dogfood).
- YouTube + LinkedIn: weekly "Competitor Teardown" videos featuring real brands.
- Free competitor-analysis tool (lead magnet) → email drip into Starter trial.
- Target: 100 paying customers by Month 6.

### **Phase 2 (Months 6-12) — Agency channel**

- White-label launch (Agency tier) — agencies resell to their clients.
- 20% recurring revenue share for agency partners (lifetime).
- Co-marketing with 3 mid-tier hosting / CRM partners.
- Target: 350 paying customers by Month 12.

### **Phase 3 (Months 12-24) — Paid acquisition + Enterprise outbound**

- Performance ads on Meta + Google (using InfoGenie's own optimizer).
- Two-person SDR team for Enterprise outbound (Apollo + HubSpot integration already built).
- Target: 1,500 paying customers + 25 Enterprise logos by Month 24.

## 9. Operations & Technology

---

### Stack

- **Backend:** Node.js / Express on Replit Deployments (auto-scale)
- **Database:** PostgreSQL with atomic writes + mutex locking
- **AI providers:** OpenAI GPT-4o, Anthropic Claude, Perplexity, Gemini, Cloudflare Workers AI (Llama 3.1) — multi-vendor for redundancy & cost optimization
- **External APIs:** DataForSEO, Firecrawl, Meta Marketing, Google Ads, TikTok Ads, HubSpot, Apollo, BuiltWith, Resend, Slack, Zernio (15-platform social), Google PageSpeed

### Cost discipline

- Per-IP, per-provider, per-day LLM budget caps prevent runaway spend.
- Automatic provider fallback (GPT-4o → GPT-4o-mini → Cloudflare Llama) for cost-sensitive operations.
- Strict-JSON prompt pattern + template fallback prevents wasted retries.

### Security & compliance

- SSRF guards on all external URL fetches.
- API key gating in production (INFOGENIE\_API\_KEY).
- HMAC-validated inbound webhooks (Resend, HubSpot).
- Roadmap: SOC 2 Type II by Month 18; GDPR-compliant by launch.

## 10. Team & Org Plan

---

### Today

- Founder / CEO — product, GTM, customer success
- AI agent (Replit) — primary engineering counterpart

### Year-1 hires (post-seed)

| Role                       | Quarter | Why now                                             |
|----------------------------|---------|-----------------------------------------------------|
| Senior Full-Stack Engineer | Q1      | Scale beyond agent-only development; SOC 2 prep     |
| Growth / Content Marketer  | Q1      | Operate the SEO + YouTube content engine            |
| Customer Success Lead      | Q2      | Reduce churn at 100+ customers; agency onboarding   |
| Performance Marketer       | Q3      | Run paid acquisition once content + organic plateau |
| Enterprise SDR ×2          | Q4      | Outbound for mid-market & agency tiers              |

## 11. Financial Projections (3 Years)

|                        | Year 1   | Year 2    | Year 3      |
|------------------------|----------|-----------|-------------|
| Paying customers (EOY) | 500      | 2,200     | 6,500       |
| Average ARPA / month   | \$135    | \$165     | \$195       |
| MRR (EOY)              | \$67,500 | \$363,000 | \$1,267,500 |
| ARR (EOY)              | \$810K   | \$4.36M   | \$15.21M    |
| Gross margin           | 62%      | 72%       | 76%         |
| Operating expenses     | \$680K   | \$2.4M    | \$6.8M      |
| EBITDA                 | −\$180K  | +\$740K   | +\$4.7M     |
| Headcount (EOY)        | 5        | 14        | 32          |

Projections assume USD 750K seed closing Q1, 8% monthly net new logo growth post Month 6, 112% NRR by Year 2.

## 12. Funding Ask & Use of Funds

**Raising: USD 750,000 Seed** (SAFE or priced round at USD 6M post). 18-month runway to USD 4M ARR / cash-flow-positive.

| Bucket                      | %   | USD       | What it funds                                   |
|-----------------------------|-----|-----------|-------------------------------------------------|
| Engineering                 | 40% | \$300,000 | 2 senior engineers, SOC 2, infrastructure       |
| Growth & Content            | 30% | \$225,000 | Marketer + content engine + paid pilots         |
| Customer Success & Sales    | 15% | \$112,500 | CSM lead + 2 SDRs (Q3+)                         |
| LLM & API costs             | 10% | \$75,000  | OpenAI / Anthropic / DataForSEO at growth scale |
| Legal / Compliance / Buffer | 5%  | \$37,500  | SOC 2, GDPR, contracts                          |

## 13. Risks & Mitigations

| Risk                                  | Likelihood | Mitigation                                                                       |
|---------------------------------------|------------|----------------------------------------------------------------------------------|
| LLM provider price hike               | Medium     | 5-vendor abstraction; fallback to Cloudflare Workers AI (Llama)                  |
| Meta / Google Ad API restrictions     | Medium     | Multi-platform (TikTok, LinkedIn roadmap); manual fallback flows already shipped |
| Hyperscaler launches similar AI suite | Medium     | Speed of iteration + vertical depth (agency white-label moat)                    |
| SMB churn / low willingness to pay    | High       | Annual prepay default; strong onboarding + ROI dashboard surfaced in week 1      |
| Regulatory (AI Act, data residency)   | Medium     | EU region option on roadmap; opt-out of model training across providers          |
| Founder bandwidth pre-hire            | High       | Replit agent-driven dev velocity; first eng hire in Q1 post-seed                 |

## 14. Roadmap & Milestones

| Quarter | Milestone                                                            |
|---------|----------------------------------------------------------------------|
| Q2 2026 | Public launch · 100 paying customers · Agency white-label GA         |
| Q3 2026 | 250 customers · Mobile companion app (iOS/Android)                   |
| Q4 2026 | 500 customers · USD 67.5K MRR · SOC 2 Type I                         |
| Q1 2027 | First Enterprise deal closed · LinkedIn Ads integration              |
| Q2 2027 | 1,000 customers · EU region · German + Spanish UI                    |
| Q4 2027 | 2,200 customers · USD 4.36M ARR · cash-flow positive · SOC 2 Type II |
| Q4 2028 | 6,500 customers · USD 15.2M ARR · Series A optionality               |

## 15. Appendix — Feature Index (high level)

---

InfoGenie ships 80+ feature tiers (T1-T38). Selected highlights:

- **T1-T8 Intelligence:** Competitor analysis, keyword gap, share of voice, win/loss intel, predictive moves, mention monitoring
- **T9-T16 Creative & Ads:** AI ad creative, multi-channel ad hub, campaign launch brief, Meta Ad Library scrape, counter-message generator, Multi-Armed Bandit optimizer
- **T17-T22 SEO:** Content gap, internal-link suggester, on-page audit, GEO audit, multi-page crawler, CRO Lab, Content Scorer, Keyword-Page map
- **T23-T28 Reporting:** Cross-channel reporting, GSC/GA4 hub, Attribution & ROI, True ROAS, Goal-Based Autonomous Monitoring, white-label PDFs
- **T29-T34 Lead & CRM:** Lead Qualifier Agent, Lookalike Builder, Unified Conversation Inbox, drip execution engine, re-engagement agent, Dynamic Audiences with HubSpot mirror
- **T35-T38 Platform:** Agentic Command Bar, white-label reports, public embed widgets, webhook channels (Slack/Telegram/Teams)

*Full per-tier index available in docs/tiers.md.*
