Welcome to InfoGenie

InfoGenie is an autonomous marketing intelligence platform. Give it a website or an industry and within 60 seconds it maps the competitive landscape, identifies your real competitors, surfaces the messages winning against you, and ships a 90-day execution plan you can act on the same day.

This manual covers every tool in the platform. Each module follows the same pattern: what it does, what to feed it, what you get back, and how to use it well. Read end-to-end the first time, then jump in via the table of contents.

How the platform works

Five stages compound on each other. Skipping one weakens the rest.

The InfoGenie Loop

Five stages that compound: each cycle sharpens the next.

Quick start
— your first
60 seconds

Get to your first insight in 60 seconds

1

Enter URL

Type your website (or pick an industry).

2

Choose country

Pick the market that matters for you.

3

Click Analyse Now

InfoGenie maps the market, finds 5+ real competitors and generates a full battle plan.

4

Review the dashboard

KPIs, competitor cards, traffic mix, and the 90-day roadmap appear automatically.

5

Take action

Click any "Counter This Message", launch a campaign, or push an audience to your ad accounts.

Getting Started

The home screen — where every InfoGenie session begins.

2

TOOLS

-
- **Home / Welcome Screen**
The starting point of the platform. Enter your website (or pick an industry), choose a target country, and trigger the full intelligence run from a single button.
 - **Get Started Roadmap**
A guided checklist that walks you through every first-time setup step in priority order.

WHAT IT DOES

The starting point of the platform. Enter your website (or pick an industry), choose a target country, and trigger the full intelligence run from a single button.

Live view: Home / Welcome Screen

INPUTS

- Website URL or industry/sector dropdown
- Target country
- "Analyse Now" trigger

OUTPUTS

- Triggers the full analysis pipeline (competitors, KPIs, Battle Plan, audiences)
- Routes you straight to the Intelligence Report dashboard

HOW TO USE IT

Open the app — you land here automatically. Type your domain (or pick a sector if you don't have one yet), confirm the country, then click "Analyse Now". Within ~60 seconds the rest of the platform is populated with live data.

WHAT IT DOES

A guided checklist that walks you through every first-time setup step in priority order.

Live view: Get Started Roadmap

INPUTS

- Click any open task to jump straight to that module

OUTPUTS

- Live progress bar
- Task completion ticks across the platform

HOW TO USE IT

Open Roadmap any time you feel stuck. Knock off the next open task — each one unlocks more downstream value.

Analyse

Understand the market through competitor intelligence, search data, and live monitoring.

32

TOOLS

-
- Intelligence Report (Dashboard)
 - Competitive Intelligence Engine
 - Intelligence Hub
 - AI Battle Plan
 - Competitor Battle Cards
 - Ad Library Spy
 - Competitor Tech Stack Detector
 - Competitor Pricing Watcher
 - Job Board Spy
 - Share of Voice Tracker
 - Crisis Radar
 - ICP Studio
 - Voice of Customer Mining
 - Review Aggregator
 - Glassdoor Sentiment
 - Mention Tracker
 - Reddit Intel
 - Reddit & Community Pulse
 - Twitter / X Pulse
 - Quora Mining
 - YouTube Channel Monitor
 - Podcast Mention Monitor
 - Newsletter Tracker

Intelligence Report (Dashboard)

ANALYSE

WHAT IT DOES

High-level overview of the competitive landscape with AI-driven growth recommendations.

Live view: Intelligence Report (Dashboard)

INPUTS

- Website URL or industry/sector
- Target country

OUTPUTS

- KPI grid (CTR, ROAS, traffic)
- Side-by-side performance charts
- 12-month traffic & spend trends
- Competitor intelligence summary

HOW TO USE IT

Enter your website or pick an industry on the home screen, choose your target country, and click "Analyse Now". The dashboard populates within 60 seconds.

WHAT IT DOES

Deep-dive analysis into specific competitors — traffic sources, threat levels, ad creative, and counter-attack plans.

Live view: Competitive Intelligence Engine

INPUTS

- Manual competitor URLs (optional)

OUTPUTS

- Competitor cards
- Threat-level scoring
- Ad creative insights
- "Attack Plan" per competitor

HOW TO USE IT

Open the Competitors view after running an analysis. Click any competitor card to drill into their channel mix and see the recommended counter-strategy.

WHAT IT DOES

Real-time monitoring of competitor signals and predictive market moves.

Live view: Intelligence Hub

INPUTS

- Auto-derived from analysis

OUTPUTS

- Predictive signals
- Budget-shift alerts
- 90-day domination roadmap
- Exportable report

HOW TO USE IT

Open the Intelligence Hub from the Analyse menu. Use "Counter This Message" on any competitor message to launch a counter-campaign in one click.

WHAT IT DOES

Strategic execution roadmap tailored to the identified market gaps.

Live view: AI Battle Plan

INPUTS

- Competitor analysis results

OUTPUTS

- Implementation steps
- 90-day strategic priorities
- Tactical playbook

HOW TO USE IT

Generated automatically after an analysis run. Review priorities top-to-bottom and assign owners.

WHAT IT DOES

Auto-generated 1-page intel briefs per competitor — positioning, strengths, weaknesses, and how to win against them.

Live view: Competitor Battle Cards

INPUTS

- Competitor name + domain (or pick from analysed list via dropdown)

OUTPUTS

- Side-by-side battle card
- Win/loss themes
- Exportable PDF

HOW TO USE IT

Click "Generate Battle Card", pick a competitor from the dropdown (or type one), and download the resulting one-pager for your sales team.

WHAT IT DOES

Pulls competitors' currently-running ads from Meta, Google, LinkedIn, TikTok and X — all in one fan-out.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

COMPETE / AD LIBRARY SPY

Ad Library Spy

Pull competitors' currently-running ads from Meta (live Graph API), Google Ads Transparency Center, LinkedIn Ad Library, TikTok Ad Library, and X (Twitter) Ads Transparency.

Search Ad Libraries

BRAND / ADVERTISER: e.g. Nike

COUNTRY: United States (US)

PLATFORMS TO SEARCH

☒ Meta Ad Library ☒ Google Ads (Search - Display - YouTube) ☒ TikTok Ad Library ☒ LinkedIn Ad Library ☒ X (Twitter) Ads Transparency

Select all

Run Ad Library Search

Meta = live Graph API - the rest scrape each platform's public ad transparency archive (requires PERPLEXITY_API_KEY).

Live view: Ad Library Spy

INPUTS

- Brand name
- Country
- Platform checklist (Meta / Google / LinkedIn / TikTok / X)

OUTPUTS

- Per-platform ad list with creative, copy and platform link

HOW TO USE IT

Type the brand, pick the country from the search-able dropdown, tick the platforms you want, then hit Run. Each platform fetches in parallel.

WHAT IT DOES

Identifies the analytics, ad platforms, CMS, and frameworks any competitor is running.

Live view: Competitor Tech Stack Detector

INPUTS

- Up to 5 competitor domains (or click "Use my analysed competitors" to auto-fill)

OUTPUTS

- Side-by-side tech matrix
- Differences vs your stack

HOW TO USE IT

Paste the domains (or click the AI-suggest button), then hit Detect. Differences highlight gaps you should investigate.

Competitor Pricing Watcher

ANALYSE

WHAT IT DOES

Tracks competitor product URLs to extract and monitor pricing changes over time.

Live view: Competitor Pricing Watcher

INPUTS

- Label, competitor name, product URL (or pick a competitor from the dropdown to auto-fill all 3)

OUTPUTS

- Latest scraped price
- Price-history chart per target

HOW TO USE IT

Add a target, then re-scan manually or wait for the cron job. Each target shows price-change deltas.

WHAT IT DOES

Monitors competitor hiring patterns to infer where they are investing strategic growth.

Live view: Job Board Spy

INPUTS

- Competitor company names

OUTPUTS

- Open-role list
- Department breakdown
- Hiring-velocity signal

HOW TO USE IT

Add competitor names — InfoGenie searches public job boards and surfaces what each is hiring for.

WHAT IT DOES

Time-series share of media mentions across you and your competitors.

Live view: Share of Voice Tracker

INPUTS

- Brand list (auto-derived from analysis)

OUTPUTS

- Stacked SoV chart
- Trend deltas

HOW TO USE IT

Open the tracker — it auto-runs daily and surfaces who is gaining or losing voice.

WHAT IT DOES

Daily anomaly detection on mention volume and sentiment to detect brand risks early.

Live view: Crisis Radar

INPUTS

- Auto-monitored brands

OUTPUTS

- Anomaly alerts (Slack + email if configured)
- Severity scoring

HOW TO USE IT

Configure thresholds once, then leave it running. Crisis Radar pings you the moment volume or sentiment breaks pattern.

WHAT IT DOES

Builds detailed Ideal Customer Profiles using voice-of-customer signals.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

ANALYSE · ICP STUDIO

ICP Studio — Ideal Customer Profile

Build a detailed customer profile, mine voice-of-customer signals from Reddit & competitor data, then activate it across Creative, Social & Email.

Auto-Draft from Brand Intel

Brand: your brand · Industry: your industry · Reddit threads available: 0 Scan now Competitors: 0

ICP not built yet · VoC not mined yet

ICP Builder

6 fields define who you're really selling to. Edit anything — AI will auto-draft if you leave it blank.

Auto-Draft from Brand Intel

AGE RANGE ROLE / STAGE INTENT STAGE

e.g. 28-45 e.g. Solo trader / SMB founder e.g. Actively comparing alternatives

TOP 3 PAIN POINTS TOP 3 DESIRES

Pain point... Desire...

Pain point... Desire...

Pain point... Desire...

BUDGET BAND

e.g. £500-£2,000/mo

Save ICP

Live view: ICP Studio

INPUTS

- Brand intelligence data
- Optional manual prompts

OUTPUTS

- Persona profiles (demographics, pains, motivations)
- Tile-level activations: ads, social, email

HOW TO USE IT

Click any ICP tile to activate that channel. Use "Save ICP" to lock in the persona for future runs.

WHAT IT DOES

AI clusters recent mentions into themes — top complaints, top praises, feature requests, and unmet needs.

Live view: Voice of Customer Mining

INPUTS

- Brand name (auto-pulled from analysis)

OUTPUTS

- Theme clusters with example quotes
- Sentiment per theme

HOW TO USE IT

Open VoC and let it run — it pulls a fresh sweep of mentions and rebuilds the themes each time.

WHAT IT DOES

Pulls recent reviews from Trustpilot, G2, Google and other platforms into one analysis surface.

Live view: Review Aggregator

INPUTS

- Brand name + sources

OUTPUTS

- Unified review feed
- Average rating
- Theme breakdown

HOW TO USE IT

Add the brand, choose the sources, hit Aggregate.

WHAT IT DOES

Analyses competitor employee reviews to infer internal health, churn risk and culture problems.

Live view: Glassdoor Sentiment

INPUTS

- Competitor company names

OUTPUTS

- Employee sentiment score
- Top complaint themes

HOW TO USE IT

Add a competitor — InfoGenie pulls public Glassdoor reviews and clusters the themes.

WHAT IT DOES

Tracks brand and competitor mentions across news and the open web.

Live view: Mention Tracker

INPUTS

- Brand & competitor list

OUTPUTS

- Live mention feed
- Sentiment-tagged

HOW TO USE IT

Open Mentions and use the search box to filter by source, sentiment or date.

WHAT IT DOES

Deep dive into subreddit discussions for market research, sentiment and reply opportunities.

Live view: Reddit Intel

INPUTS

- Brand or query string
- Scan Now trigger

OUTPUTS

- Subreddit mentions with sentiment
- AI-suggested replies in your brand voice

HOW TO USE IT

Click "Scan now" and wait ~10 seconds. Use the Reply Studio tab to draft on-brand responses.

WHAT IT DOES

Searches subreddits for brand mentions from the last 7 days with AI sentiment classification.

Live view: Reddit & Community Pulse

INPUTS

- Brand name

OUTPUTS

- 7-day mention chart
- Top threads with reply hooks

HOW TO USE IT

Open Reddit Pulse — the 7-day window auto-refreshes when you click Scan.

WHAT IT DOES

Real-time monitoring of brand conversations and trending topics on X.

Live view: Twitter / X Pulse

INPUTS

- Brand handle or hashtag

OUTPUTS

- Tweet stream
- Sentiment + engagement scores

HOW TO USE IT

Type the handle and hit Search — results update live.

WHAT IT DOES

Extracts insights from Quora questions and answers in your category.

Live view: Quora Mining

INPUTS

- Topic or brand query

OUTPUTS

- Top questions
- Answer-gap opportunities

HOW TO USE IT

Search a topic and use the surfaced questions as content briefs.

WHAT IT DOES

Tracks competitor uploads, view velocity and comment sentiment via live YouTube search.

The screenshot shows the InfoGenie YouTube Channel Monitor interface. At the top, there's a navigation bar with 'InfoGenie' logo, a 'Pro' badge, and buttons for 'Manual' and '+ Analyse'. Below this is a secondary navigation bar with 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The main content area has a blue header with 'MONITOR / YOUTUBE MONITOR' and 'YouTube Channel Monitor'. Below the header, there's a description: 'Track competitor YouTube channels — recent uploads, view-velocity, comment sentiment. Real-time data via Perplexity (no Google API key needed)'. A form titled 'Track a YouTube Channel' has three input fields: 'BRAND' (with 'e.g. Nike' as a placeholder), 'CHANNEL NAME' (with 'e.g. MrBeast' as a placeholder), and 'CHANNEL URL' (with 'https://www.youtube.com/@MrBeast' as a placeholder). A red 'Track' button is to the right of the URL field. Below the form, a message says 'No channels tracked yet. Add one above (e.g. https://www.youtube.com/@MrBeast)'. A mobile app icon is in the bottom right corner.

Live view: YouTube Channel Monitor

INPUTS

- Competitor channel names

OUTPUTS

- Recent uploads with view counts
- Comment-sentiment summary

HOW TO USE IT

Add channels — InfoGenie polls them and surfaces what is breaking out.

Podcast Mention Monitor

ANALYSE

WHAT IT DOES

Finds podcast episodes that mention your brand using live search.

The screenshot shows the 'Podcast Mention Monitor' interface within the InfoGenie application. At the top, there's a dark navigation bar with the InfoGenie logo and several menu items: 'Pro', 'Manual', and '+ Analyse'. Below this is a secondary bar with 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The main content area has a blue header with the title 'Podcast Mention Monitor' and a subtitle 'Find podcast episodes that mention your brand — host, show, sentiment, and direct episode link. Powered by Perplexity live search.' Below the header is a search form with a 'Brand' input field containing 'Nike', a 'Days back' input field with '30', and a 'Max' input field with '10'. An orange 'Scan' button is to the right of these fields. The bottom of the interface is a large, empty light blue area, likely for displaying search results.

Live view: Podcast Mention Monitor

INPUTS

- Brand name

OUTPUTS

- Episode list with show, host and timestamp

HOW TO USE IT

Run a scan — each result links straight to the episode.

WHAT IT DOES

Monitors competitor newsletter archives to extract subject lines, cadence and angles.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

COMPETE / NEWSLETTER TRACKER

Newsletter Tracker

Monitor competitor newsletter archives. Add a Substack/Beehiv/Mailchimp archive URL → AI extracts subject lines + cadence.

Track a Newsletter Archive

BRAND NEWSLETTER NAME ARCHIVE URL (Substack/Beehiv/Mailchimp/etc)

e.g. Stripe e.g. Stripe Weekly https://example.substack.com/archive Track

No newsletters tracked yet. Add an archive URL above.

Live view: Newsletter Tracker

INPUTS

- Competitor newsletter URL or name

OUTPUTS

- Subject-line list
- Send-frequency chart

HOW TO USE IT

Add a competitor newsletter — InfoGenie indexes their public archive.

WHAT IT DOES

Identifies what is currently spiking in your category via live web search.

Live view: Trending Topics

INPUTS

- Industry or category

OUTPUTS

- Ranked trending topic list
- Velocity scores

HOW TO USE IT

Pick the category — refreshed every few hours.

WHAT IT DOES

Identifies topics and keywords competitors are ranking for but you are not.

Live view: Content Gaps

INPUTS

- Your domain + competitor domains

OUTPUTS

- Gap keyword list
- Suggested article briefs

HOW TO USE IT

Run the gap analysis — each result includes a brief you can hand to AI Content.

WHAT IT DOES

Classifies keywords by user intent (Informational / Transactional / Commercial / Navigational).

The screenshot displays the InfoGenie 'Search Intent Map' interface. At the top, there's a navigation bar with 'InfoGenie' logo and several buttons: 'Pro', 'Manual', and '+ Analyse'. Below this, a secondary bar contains 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The main section is titled 'Search Intent Map' with a subtitle: 'Classify every keyword by user intent, match it to the right page type, and surface gaps your competitors are exploiting.' A 'Generate Intent Map' button is visible in the top right of this section. Below the title, there's an 'Intent Map Settings' box. It contains three input fields: 'YOUR BRAND / DOMAIN' (with 'your brand' entered), 'COMPETITORS (COMMA-SEPARATED)' (with 'OANDA, Plus500, FXCM' entered), and 'KEYWORDS TO CLASSIFY (COMMA-SEPARATED - UP TO 40)' (with 'forex trading, CFD broker reviews, best forex platform, open trading account, Plus500 vs OANDA' entered). A note below the last field says 'Auto-seeded from your competitor analysis. Edit freely.' A 'Generate Intent Map' button is also at the bottom right of the settings box. Below the settings box is a large empty white area, likely for the generated map.

Live view: Search Intent Map

INPUTS

- Generate Intent Map trigger

OUTPUTS

- Keyword !' intent mapping
- Landing-page-type recommendations

HOW TO USE IT

Click "Generate" and use the resulting clusters to plan content type per topic.

Keyword–Page Map

ANALYSE

WHAT IT DOES

Maps primary and supporting keywords to specific pages to avoid SEO cannibalisation.

Live view: Keyword–Page Map

INPUTS

- Generate Map trigger

OUTPUTS

- Visual site architecture
- Keyword !' URL assignments

HOW TO USE IT

Click "Generate Map" — InfoGenie scans your site and assigns each keyword cluster to the best-fit page.

WHAT IT DOES

Detailed research tool for discovering new keyword opportunities with volume and difficulty metrics.

Live view: Keyword Explorer

INPUTS

- Seed keyword + country

OUTPUTS

- Long-tail variants with metrics

HOW TO USE IT

Type a seed and let the explorer fan out related queries.

WHAT IT DOES

Live Google SERP tracker for any query, country and result type.

Live view: Google Search Intelligence

INPUTS

- Search query
- Country
- Type (Organic / News)

OUTPUTS

- Live ranking positions
- Competitor ad presence
- Organic visibility

HOW TO USE IT

Type a query, choose a country, choose Organic or News, and hit Search.

WHAT IT DOES

Tracks your domain's Google rank for target keywords across countries — over time.

Live view: SERP Position Tracker

INPUTS

- Keyword list + country + your domain

OUTPUTS

- Daily rank chart
- Movement alerts

HOW TO USE IT

Add the keywords once; the tracker polls daily.

WHAT IT DOES

Total backlinks and referring-domain data for any domain.

Live view: Backlink Intel

INPUTS

- Target domain

OUTPUTS

- Referring-domain list
- Authority scores

HOW TO USE IT

Type a domain — useful for sizing competitor link profiles.

WHAT IT DOES

Continuous monitoring of backlink-profile changes and new link discoveries.

Live view: Backlink Monitor

INPUTS

- Your domain

OUTPUTS

- New / lost link feed
- Change deltas

HOW TO USE IT

Set the watched domain once — alerts when links are gained or lost.

Create

Build and manage every marketing asset — copy, creative, video, scripts, calendars.

22

TOOLS

-
- Brand Creative Library
 - Templates Library
 - AI Creative Generation Engine
 - Smart Creative Builder
 - Carousel Generator
 - AI UGC Avatars
 - AI Voiceovers
 - Voiceover Studio
 - Video Script Generator
 - Content AI
 - Headline & Hook Tester
 - AI Press Release Generator
 - AI Cold Email Writer
 - AI Sales Email Personalizer
 - Reply Assistant
 - Chatbot Builder
 - Localization (40+ languages)
 - AI Landing Page Builder
 - Schema Generator
 - Campaign Intelligence
 - Social Calendar & Generator
 - Content Calendar Auto-Pilot

WHAT IT DOES

Centralised repository for all brand-related files (logos, banners, social, video, PDFs).

Live view: Brand Creative Library

INPUTS

- File uploads up to 50MB (JPG/PNG/GIF/WebP/MP4/MOV/PDF/SVG)
- Category tags

OUTPUTS

- Searchable asset grid
- Filter by type

HOW TO USE IT

Drag and drop files into the Brand Assets uploader, then tag by category for fast retrieval.

WHAT IT DOES

Pre-built marketing and creative templates ready to clone and customise.

Live view: Templates Library

INPUTS

- Filter by channel / format

OUTPUTS

- One-click clone into the relevant builder

HOW TO USE IT

Pick a template, click Use, then edit in place.

WHAT IT DOES

Generates ad copy and headlines benchmarked against real competitor performance.

Live view: AI Creative Generation Engine

INPUTS

- Competitor intel
- Generate More trigger

OUTPUTS

- Ad copy variants
- Headline options
- Campaign briefs

HOW TO USE IT

Pick the competitor and channel, then click Generate. Iterate until you hit the angle you want.

WHAT IT DOES

Data-driven ad creative builder that combines copy, image and call-to-action against tested patterns.

Live view: Smart Creative Builder

INPUTS

- Brand assets + product/offer context

OUTPUTS

- Multi-variant ad mockups ready for export

HOW TO USE IT

Open Smart Creative, pick the format, and step through the builder.

WHAT IT DOES

Creates multi-image carousel ads for social platforms automatically.

The screenshot shows the 'Viral Carousel Generator' interface within the InfoGenie dashboard. The dashboard has a dark theme with a top navigation bar containing 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' tabs. The 'Create' tab is active. Below the navigation bar, there's a blue header for 'Viral Carousel Generator' with a sub-header 'How to Make a Viral Carousel' and a list of steps: 1. Hook, 2. Context, 3. Value, 4. Action. The main form is divided into two steps: 'STEP 1 - TOPIC' and 'STEP 2 - STRUCTURE'. 'STEP 1' has a text input field with the example 'e.g. How small businesses can rank on Google in 2026'. 'STEP 2' has four buttons for structure: 'Pure Info' (selected), 'Storytelling', 'Problem-Solution', and 'Listicle'. Below these are two optional fields: 'BRAND VOICE (optional)' with the example 'expert, plain-spoken, no jargon' and 'AUDIENCE (optional)' with the example 'small business owners and marketers'. At the bottom is a large blue button labeled 'Generate 10-Slide Carousel'.

Live view: Carousel Generator

INPUTS

- Topic + brand assets

OUTPUTS

- 5-10 slide carousel ready to publish

HOW TO USE IT

Type the topic, pick a style, and let it generate the slide deck.

WHAT IT DOES

Generates AI-based user-generated-content avatars for short video marketing.

Live view: AI UGC Avatars

INPUTS

- Script + avatar selection

OUTPUTS

- Talking-head video clip

HOW TO USE IT

Pick an avatar, paste a script, hit Generate — output downloads as MP4.

WHAT IT DOES

Generates high-quality AI speech for ads and video content.

Live view: AI Voiceovers

INPUTS

- Script + voice + language

OUTPUTS

- Downloadable audio file

HOW TO USE IT

Paste text, pick a voice, hit Generate.

WHAT IT DOES

Specialised studio for creating, editing and tuning AI-generated voiceovers.

Live view: Voiceover Studio

INPUTS

- Script + voice/style controls

OUTPUTS

- Polished voiceover audio

HOW TO USE IT

Use Studio when you need finer control — pacing, emphasis, multi-take comparison.

WHAT IT DOES

Drafts scripts for video ads and content based on goal and audience.

The screenshot shows the 'Video Script Generator' interface within the InfoGenie dashboard. The dashboard has a dark theme with a top navigation bar containing 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' tabs. The 'Create' tab is active. Below the navigation bar, there's a section titled 'VIDEO SCRIPTS' with a sub-header 'Video Script Generator'. A description states: 'Generate short-form video scripts for TikTok, Reels, Shorts and LinkedIn. Each variant includes hook, body lines, on-screen text cues, B-roll directions, CTA and hashtags.' The form includes a 'TOPIC / PRODUCT' text input with the example 'e.g. "5 hidden features of our analytics dashboard"'. Below this are four fields: 'PLATFORM' (a dropdown menu showing 'TikTok'), 'TONE' (a dropdown menu showing 'Energetic'), 'DURATION (s)' (a text input showing '30'), and 'VARIANTS' (a text input showing '3'). A pink 'Generate Scripts' button is located below the form. The interface also features a 'Pro' badge, a user profile icon, and a '+ Analyse' button in the top right corner.

Live view: Video Script Generator

INPUTS

- Topic + goal + length

OUTPUTS

- Hook, body and CTA-structured script

HOW TO USE IT

Pick the goal (awareness / conversion), enter the topic, and refine.

WHAT IT DOES

General AI tool for generating marketing copy and articles.

Live view: Content AI

INPUTS

- Topic + brief + tone

OUTPUTS

- SEO-aware article draft

HOW TO USE IT

Use the brief field to be specific — better briefs produce far better content.

WHAT IT DOES

Scores headlines across virality patterns and provides alternate variants.

The screenshot shows the 'Headline & Hook Tester' interface within the InfoGenie application. The top navigation bar includes 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The main section is titled 'Headline & Hook Tester' and includes a description: 'Score any headline 0-100 across virality patterns + get up to 10 alternate variants ranked by predicted performance.' Below this is a form titled 'Test a Headline' with fields for 'HEADLINE', 'AUDIENCE', 'CHANNEL', and 'VARIANTS'. The 'HEADLINE' field contains 'e.g. \"Stop wasting ad budget — automate it\"'. The 'AUDIENCE' field contains 'e.g. SaaS founders, Series A-B'. The 'CHANNEL' dropdown is set to 'Landing page'. The 'VARIANTS' field is set to '8'. A red button labeled 'Score + Generate Variants' is positioned below the form fields.

Live view: Headline & Hook Tester

INPUTS

- Original headline

OUTPUTS

- Score + reasoning + 5 alternative headlines

HOW TO USE IT

Paste a headline and review the alternatives before publishing.

WHAT IT DOES

Drafts AP-style press releases for launches and crisis responses.

The screenshot shows the InfoGenie AI Press Release Generator interface. At the top, there's a navigation bar with 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' tabs. The 'Create' tab is active. Below the navigation bar, there's a header for 'AI Press Release Generator' with a sub-header 'Draft AP-style press releases for crisis response, product launches, milestones, partnerships and competitor counter-positioning. Pull context from any Crisis Incident or Battle Card.' The main form has several input fields: 'Brand' (with 'Nike' entered), 'Type' (with 'Crisis Response' selected), 'Spokesperson (optional)' (with 'e.g. Jane Doe, CEO' entered), 'Headline hint (optional)' (with 'e.g. emphasise innovation' entered), and 'Context (what's the news?)' (with a placeholder text 'Describe the situation, news, or angle the release should cover. Be specific — facts, dates, numbers.'). A 'Generate Press Release' button is at the bottom of the form.

Live view: AI Press Release Generator

INPUTS

- Topic + key facts + quote

OUTPUTS

- Wire-ready press release

HOW TO USE IT

Fill the brief — InfoGenie produces the AP-formatted release.

WHAT IT DOES

Drafts multi-step cold outreach sequences tailored to specific prospects.

Live view: AI Cold Email Writer

INPUTS

- Prospect / persona + offer

OUTPUTS

- 3-5 email cadence ready to copy

HOW TO USE IT

Describe the prospect; the writer builds the full sequence.

WHAT IT DOES

Personalises base templates with research from each lead's company website.

The screenshot shows the 'AI Sales Email Personalizer' interface within the InfoGenie application. The top navigation bar includes 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' tabs, along with user profile and subscription status ('Pro', 'Manual'). The main content area is titled 'EMAIL PERSONALIZER' and 'AI Sales Email Personalizer'. It provides a description: 'Take a base cold-email template, paste your leads, and get one personalized email per lead — with real research from each lead's company website (Firecrawl + GPT-4o-mini). Pulls leads automatically from B2B Lead Finder.' The interface is divided into two main sections: 'Base Template' and 'Leads (one per line, JSON)'. The 'Base Template' section contains a text area with a placeholder email template: 'Hi [FIRST_NAME], I noticed [COMPANY] is doing X — wanted to ask about Y. Worth 15 min?'. Below this, it lists supported tokens: [NAME], [FIRST_NAME], [COMPANY], [ROLE], [WEBSITE], and a note that AI will replace and personalize using each lead's website. A 'TONE' dropdown is set to 'professional, warm, specific', and a checkbox for 'Use website research (Firecrawl)' is checked. The 'Leads' section contains a JSON input field with a sample lead: {'name': 'Jane Doe', 'role': 'VP Marketing', 'company': 'Acme Corp', 'website': 'acme.com'}. Buttons for 'Pull leads from B2B Lead Finder' and 'Load sample' are located at the top right of the 'Base Template' section.

Live view: [AI Sales Email Personalizer](#)

INPUTS

- Base template + lead URL

OUTPUTS

- Personalised email per lead

HOW TO USE IT

Drop in a template and a lead URL — output is personalised in seconds.

WHAT IT DOES

Identifies unanswered mentions and drafts AI replies in your brand tone.

Live view: Reply Assistant

INPUTS

- Saved brand persona (from ICP Studio)

OUTPUTS

- On-brand reply drafts ready to post

HOW TO USE IT

Set up a persona once, then approve or edit each suggested reply.

WHAT IT DOES

Build and deploy AI-powered chatbots embedded on your site.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

REACH CHATBOT BUILDER

Chatbot Builder

Generate a website FAQ chatbot — greeting, 8-15 Q&A entries, fallback handler, lead-capture form and a copy-pasteable embed snippet — all from a one-line description.

BRAND NAME* e.g. Acme Inc

AUDIENCE e.g. small-business owners

PRODUCT / SERVICE DESCRIPTION e.g. We sell AI-powered marketing intelligence software starting at \$99/month. Self-serve signup, 14-day free trial. Integrates with HubSpot and Salesforce.

TONE Friendly

ACCENT COLOR

Generate Chatbot

Live view: Chatbot Builder

INPUTS

- Knowledge base + tone + handoff rules

OUTPUTS

- Embeddable chat widget

HOW TO USE IT

Step through the builder, then paste the embed snippet on your site.

Localization (40+ languages)

CREATE

WHAT IT DOES

Translates and adapts marketing content for over 40 languages — preserving brand voice.

Live view: Localization (40+ languages)

INPUTS

- Source text + target language

OUTPUTS

- Localised, culturally-adapted copy

HOW TO USE IT

Paste copy, pick the language, hit Translate.

WHAT IT DOES

Generates full HTML landing pages including hero, features, FAQ and CTA from a brief.

Live view: AI Landing Page Builder

INPUTS

- Product / offer brief

OUTPUTS

- Hosted landing page + downloadable HTML

HOW TO USE IT

Fill the brief, pick a style, click Build — the page deploys automatically.

WHAT IT DOES

Creates JSON-LD schema markup to improve search visibility and rich-result eligibility.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

CONVERTS / SCHEMA GENERATOR

Schema.org / JSON-LD Generator

Form-based generator for the 8 most-used Schema.org types — Organization · Article · Product · FAQ · LocalBusiness · Breadcrumb · Event · Recipe. Outputs paste-ready <script type="application/ld+json"> blocks. Schema is what ChatGPT and Perplexity parse to cite your site, so this directly boosts AI Visibility (TI).

SCHEMA TYPE

Organization Article / BlogPosting Product FAQ Page Local Business Breadcrumb Event Recipe

Fields

name *
Acme Inc.

url *
https://acme.com

logoUrl
https://acme.com/logo.png

description
One-line summary of what you do

sameAs
https://twitter.com/acme + Add row

JSON-LD output Copy

Missing required fields: name, url

Live view: Schema Generator

INPUTS

- Page type + entity details

OUTPUTS

- Copy-paste JSON-LD block

HOW TO USE IT

Pick the schema type and fill the fields — the markup is generated immediately.

WHAT IT DOES

AI-generated campaign improvements and structural recommendations with one-click launch.

Live view: Campaign Intelligence

INPUTS

- Launch modal: budget, platform, region

OUTPUTS

- Automated deployment to Google, Meta, TikTok

HOW TO USE IT

Click Launch Campaign on any recommendation to push the campaign live to your connected ad accounts.

WHAT IT DOES

End-to-end social media management — generate posts, schedule, and visualise.

Live view: Social Calendar & Generator

INPUTS

- Create Post trigger (text/images)

OUTPUTS

- Visual calendar
- Scheduled posts across platforms

HOW TO USE IT

Use Create Post to draft content, set a publish time, and approve. Posts appear in the Master Calendar.

WHAT IT DOES

Generates a multi-channel content calendar with hooks, copy and timing — for any window you pick.

The screenshot shows the 'Content Calendar Auto-Pilot' interface within the InfoGenie application. The top navigation bar includes 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The 'Create' tab is active. Below the navigation bar, the 'CONTENT CALENDAR' section is highlighted. The main heading is 'Content Calendar Auto-Pilot', with a subtext: 'Generate a fully-fledged multi-channel content calendar in seconds — hook, copy, hashtags, CTA and best time per post.' The form contains several input fields: 'Brand' (Nike), 'Goal' (e.g. drive 10% more sign-ups), 'Days' (7), 'Audience' (e.g. urban athletes 18-34), and 'Tone' (e.g. bold + motivational). Below these are checkboxes for 'Channels': Instagram (checked), TikTok (unchecked), LinkedIn (checked), X (checked), Facebook (unchecked), YouTube (unchecked), Blog (unchecked), and Email (unchecked). A green 'Generate Calendar' button is at the bottom of the form. A blue circular button with a document icon is visible in the bottom right corner of the interface.

Live view: Content Calendar Auto-Pilot

INPUTS

- Window (week / month / quarter) + channels

OUTPUTS

- Pre-populated calendar ready to schedule

HOW TO USE IT

Pick the window and channels, click Generate, then approve or edit each entry.

Reach

Distribute content and ads to target audiences across every channel that matters.

28

TOOLS

- Audience Intelligence
- Lookalike Audiences
- Dynamic Audiences
- B2B Lead Finder
- Lead Qualifier
- HubSpot Sync
- Multi-Channel Advertising Hub

- Search & AI Visibility
- GEO Audit (AI Engines)
- SEO On-Page Auditor
- Site SEO Crawler
- SEO Task Manager
- Local SEO Basics
- Web Vitals Auditor
- Social Tags Audit
- Email Deliverability Auditor

WHAT IT DOES

Identifies and targets high-converting audience segments.

Live view: Audience Intelligence

INPUTS

- Auto-Target trigger

OUTPUTS

- Defined audience segments
- Targeting parameters for ad platforms

HOW TO USE IT

Click Auto-Target to let InfoGenie build your top 5 segments automatically. Push them straight to Meta, Google, or TikTok.

WHAT IT DOES

Creates new audience segments that mirror your best customers or competitor targets.

Live view: Lookalike Audiences

INPUTS

- Seed audience or customer list

OUTPUTS

- Lookalike segment ready for paid platforms

HOW TO USE IT

Pick a seed, choose the similarity tier, push to your ad account.

WHAT IT DOES

Real-time rule-based segments where contacts auto-flow in and out based on behaviour.

Live view: Dynamic Audiences

INPUTS

- Rule builder (events / properties / time windows)

OUTPUTS

- Live audience with mirrored HubSpot list
- Optional bind to a Drip sequence

HOW TO USE IT

Build the rule in the Phase 1 UI, preview membership, then bind to a HubSpot list or drip sequence.

WHAT IT DOES

Searches a database of 275M+ contacts for prospects matching your ICP.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

REACH / B2B LEAD FINDER

B2B Lead Finder

Search Apollo's 275M+ contact database for prospects matching your ICP — by job title, seniority, location, industry, and company size.

Job titles (comma-sep)
VP Marketing, Head of Growth, CMO

Seniorities
c suite
vp
director
lead

Locations (comma-sep)
United States, United Kingdom

Company size
min max

Powered by Apollo.io - 275M+ B2B contacts - per request: 10 leads

Find Leads

Live view: B2B Lead Finder

INPUTS

- Filters: industry, role, company size, geography

OUTPUTS

- Contact list with email + LinkedIn

HOW TO USE IT

Set the filters, run the search, push selected leads to HubSpot.

WHAT IT DOES

Automatically scores leads on firmographic and intent signals.

Live view: Lead Qualifier

INPUTS

- Lead list (from CRM or Lead Finder)

OUTPUTS

- BANT-style score per lead

HOW TO USE IT

Run the qualifier — leads move into hot / warm / cold buckets automatically.

WHAT IT DOES

Pushes leads, influencers and dynamic audiences from InfoGenie directly into your HubSpot CRM.

Live view: HubSpot Sync

INPUTS

- HubSpot private app token (Settings)

OUTPUTS

- Synced contacts + lists in HubSpot

HOW TO USE IT

Connect HubSpot once in Settings — sync runs on demand or on a schedule.

Multi-Channel Advertising Hub

REACH

WHAT IT DOES

Management interface for lead-generation ads across 20+ channels.

Live view: Multi-Channel Advertising Hub

INPUTS

- New Campaign trigger
- Platform connections

OUTPUTS

- Integrated campaign management
- Cross-platform performance tracking

HOW TO USE IT

Connect your ad accounts in Settings, then use New Campaign to launch coordinated buys across selected platforms.

WHAT IT DOES

Connect and sync existing ad campaigns from external platforms into InfoGenie's optimiser.

Live view: Import Campaigns

INPUTS

- Platform credentials

OUTPUTS

- Imported campaigns visible under Tracked Campaigns

HOW TO USE IT

Click Import after connecting a platform — InfoGenie pulls the campaign tree.

WHAT IT DOES

Organise campaigns into logical groups for bulk AI optimisation.

Live view: Optimization Folders

INPUTS

- Folder name + campaign assignments

OUTPUTS

- Folder-level optimisation rules

HOW TO USE IT

Create a folder, assign campaigns, then attach optimisation rules at the folder level.

WHAT IT DOES

Directly publishes content to connected social accounts.

Live view: Social Publisher

INPUTS

- Post content + platform + schedule

OUTPUTS

- Published or scheduled posts

HOW TO USE IT

Compose, pick the platforms, schedule or publish.

WHAT IT DOES

Creates scientifically angled test variants with predicted lift before you run them.

The screenshot shows the 'AI A/B Test Designer' interface within the InfoGenie application. The top navigation bar includes 'Analyse', 'Create', 'Reach' (active), 'Grow', and 'Manage'. The main header area displays 'A/B TEST DESIGNER' and 'AI A/B Test Designer' with a subtext: 'Drop in any subject line, ad headline, CTA or hero copy and get scientifically-angled variants with a hypothesis, primary metric, predicted lift, and recommended split.' The input form contains the following fields: 'Brand (optional)' with 'e.g. Nike', 'Element type' with 'Email subject line', 'Variants' with '4', 'Goal' with 'e.g. drive 10% more click-throughs', and 'Audience' with 'e.g. lapsed customers, 30-50'. There is a text area for 'Original copy (control)' with the placeholder 'Paste the existing subject line, headline, CTA, etc.' and a 'Design Variants' button.

Live view: AI A/B Test Designer

INPUTS

- Hypothesis + control element

OUTPUTS

- Variant set with predicted lift + sample-size guidance

HOW TO USE IT

Describe the hypothesis — InfoGenie produces variants and tells you how long to run.

WHAT IT DOES

Drop-in widgets and patterns designed to lift on-page conversion rates.

Live view: Conversion Boosters

INPUTS

- Page type + goal

OUTPUTS

- Embeddable booster snippets

HOW TO USE IT

Pick a booster, paste the snippet, monitor lift in CRO Lab.

WHAT IT DOES

Finds active creators in any niche via live web search.

Live view: Influencer Discovery

INPUTS

- Niche + region + platform

OUTPUTS

- Creator list with handles, audience size, engagement

HOW TO USE IT

Search a niche — push promising creators to the CRM with one click.

WHAT IT DOES

Pipeline tracker for creator partnerships, outreach and deal management.

Live view: Influencer CRM

INPUTS

- Creator records + status changes

OUTPUTS

- Kanban-style pipeline

HOW TO USE IT

Move creators through your pipeline; sync to HubSpot if needed.

WHAT IT DOES

Monitors brand presence in AI engines like ChatGPT, Claude and Perplexity.

Live view: Search & AI Visibility

INPUTS

- Brand + tracked prompts

OUTPUTS

- Citation tracking
- Sentiment per engine

HOW TO USE IT

Add the prompts you care about — InfoGenie polls the AI engines and flags drift.

WHAT IT DOES

Audits how AI engines respond to brand queries in specific geographies.

Live view: GEO Audit (AI Engines)

INPUTS

- Brand + region + prompt set

OUTPUTS

- Per-engine response transcript + citation analysis

HOW TO USE IT

Pick the region and prompts, hit Audit, then export the report.

WHAT IT DOES

Analyses individual pages for SEO best practice and technical issues.

Live view: SEO On-Page Auditor

INPUTS

- Page URL

OUTPUTS

- Pass/fail checklist + fix suggestions

HOW TO USE IT

Paste a URL — every issue includes a recommended fix.

WHAT IT DOES

Crawls entire websites to surface hidden SEO problems.

Live view: Site SEO Crawler

INPUTS

- Root domain + crawl depth

OUTPUTS

- Per-page issue report
- Site-wide health grade

HOW TO USE IT

Start the crawl — issues are grouped by severity for triage.

WHAT IT DOES

Organises and tracks SEO improvements and technical fixes as a Kanban board.

Live view: SEO Task Manager

INPUTS

- Tasks created from auditor / crawler

OUTPUTS

- Status-tracked task list

HOW TO USE IT

Move tasks across columns as they're completed.

WHAT IT DOES

Essential tools for managing local business listings and local search presence.

Live view: Local SEO Basics

INPUTS

- Business name + address + categories

OUTPUTS

- Listing-health checklist

HOW TO USE IT

Fill the business profile and review the listings checklist.

WHAT IT DOES

Audits Core Web Vitals and Lighthouse scores for any URL.

Live view: Web Vitals Auditor

INPUTS

- Page URL

OUTPUTS

- CWV report + Lighthouse breakdown

HOW TO USE IT

Paste a URL and run — fix the items flagged red first.

WHAT IT DOES

Checks Open Graph and Twitter card tags for proper social sharing.

Live view: Social Tags Audit

INPUTS

- Page URL

OUTPUTS

- Tag-by-tag pass/fail with the actual values

HOW TO USE IT

Paste the URL — fix any missing tags before sharing widely.

WHAT IT DOES

Performs DNS lookups for SPF, DKIM and DMARC to ensure email delivery.

Live view: Email Deliverability Auditor

INPUTS

- Sending domain

OUTPUTS

- SPF / DKIM / DMARC status + fix suggestions

HOW TO USE IT

Paste the domain — copy any missing DNS records straight from the result.

WHAT IT DOES

A lead-capture widget that provides SEO audits to your site visitors.

Live view: Embeddable Audit Widget

INPUTS

- Branding + lead-capture fields

OUTPUTS

- Embed snippet for your site

HOW TO USE IT

Configure the widget, paste the snippet, harvest the leads.

WHAT IT DOES

Aggregates messages and mentions from multiple channels into one inbox.

Live view: Unified Inbox

INPUTS

- Connected channels

OUTPUTS

- Single threaded inbox

HOW TO USE IT

Connect your channels — every conversation lands here.

WHAT IT DOES

Routes crisis, share-of-voice and digest alerts to Slack and email based on rules.

Live view: Smart Alert Routing

INPUTS

- Slack webhook + email + rule set

OUTPUTS

- Routed alerts in real time

HOW TO USE IT

Define rules once — the right alert goes to the right place automatically.

AI Daily Digest

REACH

WHAT IT DOES

One-page executive summary of crisis, trends and competitor activity — every morning.

Live view: AI Daily Digest

INPUTS

- Auto-pulled signals

OUTPUTS

- Daily PDF / inbox digest

HOW TO USE IT

Subscribe once — the digest lands in your inbox every morning.

WHAT IT DOES

Downloads TikTok videos for creative research and archival.

Live view: TikTok Downloader

INPUTS

- TikTok video URL

OUTPUTS

- Downloadable MP4

HOW TO USE IT

Paste the URL and click Download.

Grow

Optimise visibility, automate execution and measure long-term performance.

INPUTS

- Goal definitions + targets + windows

OUTPUTS

- Progress chart + variance to target

HOW TO USE IT

Set goals once — the platform tracks variance automatically.

WHAT IT DOES

Long-term performance tracking against business goals.

Live view: KPI Tracker

INPUTS

- Data from connected ad/analytics accounts

OUTPUTS

- Growth-trend visualisations
- Goal-completion charts

HOW TO USE IT

Set your goals once, then check progress weekly. Anomalies are flagged automatically.

WHAT IT DOES

Marketing-command view showing upcoming launches and system risks.

Live view: Action Center

INPUTS

- Refresh trigger

OUTPUTS

- Live status feed
- Upcoming milestones
- Optimisation opportunities

HOW TO USE IT

Visit daily as your single pane of glass. Click any item to jump to the relevant module.

WHAT IT DOES

Automated SEO execution — article generation, on-page fixes and backlink tracking.

Live view: AutoSEO Pro

INPUTS

- WordPress credentials (API)
- Target keywords

OUTPUTS

- Published articles
- Backlink reports
- Keyword research

HOW TO USE IT

Connect WordPress in Settings, choose target keywords, and let AutoSEO publish optimised articles on a schedule.

WHAT IT DOES

Grades existing content against SEO and readability benchmarks.

Live view: Content Scorer

INPUTS

- Page URL or pasted text

OUTPUTS

- Score + ranked improvement list

HOW TO USE IT

Paste the content, review the score, fix the items at the top of the list.

Internal Link Suggester

GROW

WHAT IT DOES

AI recommendations for building an internal-link structure that lifts site authority.

Live view: Internal Link Suggester

INPUTS

- Source page URL

OUTPUTS

- Suggested target pages + anchor text

HOW TO USE IT

Run on each new piece of content — apply the top suggestions in your CMS.

WHAT IT DOES

Hub for managing and analysing conversion-rate-optimisation experiments.

Live view: CRO Lab

INPUTS

- Experiment definitions + traffic split

OUTPUTS

- Statistical lift + winning variant

HOW TO USE IT

Define the experiment, monitor lift, ship the winner.

WHAT IT DOES

Independent deep-dive audits for various AI-performance metrics.

Live view: AI Audit Suite

INPUTS

- Audit selection (Prompt Coverage, Entity Mapping, etc.)

OUTPUTS

- Reports on answer accuracy, AI Overviews, citation-to-traffic attribution

HOW TO USE IT

Pick the audit type and click Run. Reports save to the Action Center for follow-up.

WHAT IT DOES

Tracks how your brand is cited by LLMs (ChatGPT, Claude, Gemini, Perplexity).

Live view: AI Visibility Intelligence

INPUTS

- Run AI Audit trigger

OUTPUTS

- Citation tracking
- Brand sentiment in AI responses
- Optimisation recommendations

HOW TO USE IT

Click Run AI Audit. The dashboard shows where you appear (and where you don't) in AI answer engines.

Meta Ads Insights

GROW

WHAT IT DOES

Live performance data from your Meta Ads account — spend, ROAS, top creatives.

Live view: Meta Ads Insights

INPUTS

- Meta access token (Settings)

OUTPUTS

- Live spend / ROAS chart + top ad list

HOW TO USE IT

Connect Meta in Settings — data refreshes hourly.

WHAT IT DOES

Real-time performance metrics and top-ad tracking for Google Ads.

Live view: Google Ads Insights

INPUTS

- Google Ads OAuth (Settings)

OUTPUTS

- Live spend, conversions, top ads

HOW TO USE IT

Connect Google Ads in Settings — the optimiser uses this feed too.

WHAT IT DOES

Spend, ROAS and campaign performance from the TikTok Marketing API.

Live view: TikTok Ads Insights

INPUTS

- TikTok access token + advertiser ID (Settings)

OUTPUTS

- Spend / ROAS / video metrics

HOW TO USE IT

Connect TikTok in Settings to surface live ad data.

WHAT IT DOES

Aggregated performance data across all connected social channels.

Live view: Social Analytics

INPUTS

- Connected social accounts

OUTPUTS

- Per-channel reach, engagement, follower trend

HOW TO USE IT

Connect channels — the dashboard rebuilds automatically.

WHAT IT DOES

24/7 reinforcement-learning engine that optimises ad campaigns automatically.

Live view: AI Optimizer

INPUTS

- Connected ad accounts + risk thresholds

OUTPUTS

- PAUSE / SCALE / HOLD recommendations every 6 hours

HOW TO USE IT

Start in dry-run, review the moves, then flip to live mode when comfortable.

WHAT IT DOES

Integrated view of Google Search Console and Google Analytics 4 data.

Live view: GSC / GA4 Hub

INPUTS

- GSC + GA4 OAuth (Settings)

OUTPUTS

- Search query + landing-page performance

HOW TO USE IT

Connect GSC and GA4 in Settings — the hub merges both feeds.

WHAT IT DOES

AI-powered analysis of user behaviour and product usage from Amplitude.

Live view: Amplitude AI Agents

INPUTS

- Amplitude API key

OUTPUTS

- Funnel insights + behavioural cohorts

HOW TO USE IT

Connect Amplitude — the agents surface insights you would normally miss.

Blended Performance

GROW

WHAT IT DOES

Unified view of performance across all paid and organic channels.

Live view: Blended Performance

INPUTS

- Connected ad + analytics accounts

OUTPUTS

- Blended CAC, ROAS and revenue chart

HOW TO USE IT

Use weekly to see the big picture across every channel.

WHAT IT DOES

Multi-touch attribution to determine the true ROI per channel.

Live view: Attribution & ROI

INPUTS

- Tracked conversions + channel data

OUTPUTS

- Per-channel attributed revenue + ROI

HOW TO USE IT

Compare attribution windows to see which channel really drives revenue.

WHAT IT DOES

Accurate ROAS calculation by blending ad spend with real-time revenue.

Live view: True ROAS

INPUTS

- Spend feed + revenue feed

OUTPUTS

- True ROAS vs platform-reported ROAS

HOW TO USE IT

Use to spot platforms inflating their attributed revenue.

Predictive Churn Scorer

GROW

WHAT IT DOES

AI predicts which customers are at risk of leaving based on activity patterns.

Live view: Predictive Churn Scorer

INPUTS

- Customer activity data

OUTPUTS

- Risk score per customer + reasons

HOW TO USE IT

Run weekly — push high-risk customers into a Re-Engage drip.

Manage

Operations, reporting, and platform configuration.

Master Calendar

MANAGE

WHAT IT DOES

Unified view of all scheduled marketing activity — campaigns, content, social, launches.

Live view: Master Calendar

INPUTS

- Auto-sync from other modules

OUTPUTS

- Global timeline of marketing operations

HOW TO USE IT

Open Master Calendar to see every scheduled action. Click any item to edit in its source module.

Launch Calendar

MANAGE

WHAT IT DOES

Specific timeline for product and feature releases.

InfoGenie

Pro Manual + Analyse

Analyse Create Reach Grow Manage

MANAGE · LAUNCH CALENDAR

Launch Calendar

Schedule campaign go-live dates — get 24h & 1h reminders in your bell + stakeholder inboxes

☐ Schedule a launch

Launch name (e.g. Q2 product launch) mm/dd/yyyy, --:-- -- Email

Optional notes — what's launching, owner, success metric...

Reminders fire automatically: 24h before, 1h before, and at go-live. Stakeholders get an email at every reminder.

+ Schedule launch

No launches scheduled yet — schedule your first one above.

Source: InfoGenieLaunchEngine · high confidence · data/launches.json(file persistence) + setInterval 60s sweeper

Live view: Launch Calendar

INPUTS

- Launch records (name, date, owner)

OUTPUTS

- Launch-only calendar view

HOW TO USE IT

Add each launch — InfoGenie reminds you of upcoming releases.

WHAT IT DOES

Tools for customer retention and win-back campaigns.

Live view: Re-Engage

INPUTS

- Customer data segments

OUTPUTS

- Re-engagement campaign automation

HOW TO USE IT

Upload or pull a customer list, choose a segment, and launch a re-engagement sequence.

WHAT IT DOES

Workflow builder for connecting different parts of the marketing stack.

Live view: Automations

INPUTS

- Trigger / Action definitions

OUTPUTS

- Cross-platform automated workflows

HOW TO USE IT

Pick a trigger (e.g. competitor budget surge) and link it to an action (e.g. increase Meta bids).

WHAT IT DOES

Manage team members and external partners involved in your marketing operation.

The screenshot shows the 'Stakeholders' management page in the InfoGenie application. The page has a dark blue header with the InfoGenie logo and navigation tabs: 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' (which is active). Below the header, there's a blue banner with the title 'Stakeholders' and a subtitle 'Add the people who get a digest email when a high-severity alert fires (max one per 30 min)'. The main content area is divided into two columns. The left column has a form to 'Add stakeholder' with fields for 'Full name' and 'email@company.com', and a '+ Add to alert list' button. The right column has a 'When emails fire' section with a list of conditions: 'Any new alert with severity ≥ high from /api/alerts/check', 'Launch reminders fired by the calendar (24h, 1h, live)', and 'Throttled to one digest every 30 minutes to avoid noise'. It also shows 'Last digest sent: —' and a 'Resend configured ✓' status. Below this, there are two buttons: 'Send test email now' and 'Test Slack/Discord'. At the bottom, there's a table titled '2 stakeholders on the list' with columns 'NAME', 'EMAIL', and 'ADDED'. The table lists 'LINDA VENTER' with email 'linda@suretrade.co.za' and 'ADDED' date '5/6/2026', and 'Paul Venter' with email 'paul@suretrade.co.za' and 'ADDED' date '5/4/2026'. Each row has a 'Remove' button. Below the table, there's a section for 'Webhook channels — real-time alerts to chat' with a note: 'Same alerts as the email digest, delivered instantly to Slack, Teams, Telegram, or any generic HTTPS endpoint. No API keys from us — paste your own webhook URL.'

NAME	EMAIL	ADDED
LINDA VENTER	linda@suretrade.co.za	5/6/2026
Paul Venter	paul@suretrade.co.za	5/4/2026

Live view: Stakeholders

INPUTS

- Person records + roles

OUTPUTS

- Stakeholder directory

HOW TO USE IT

Add people once — assign owners on tasks across the platform.

WHAT IT DOES

Summarises sales-call transcripts, generates BANT scoring and pulls out action items.

The screenshot shows the 'AI Meeting Note Summarizer' interface within the InfoGenie application. The top navigation bar includes 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage' (selected). The main header area is blue and contains the title 'AI Meeting Note Summarizer' and a description: 'Paste any sales-call transcript → get summary, BANT scoring, action items, deal-stage prediction, risks and next-step recommendation.' Below this is a white box titled 'Sales-Call Transcript' with a text area for pasting the transcript. Below the text area are three optional input fields: 'Contact name (optional)', 'Company (optional)', and 'Role (optional)'. A 'Summarize + Score' button is at the bottom of the white box. The interface is dark-themed with a blue accent color.

Live view: AI Meeting Note Summariser

INPUTS

- Pasted transcript or recording

OUTPUTS

- Summary + BANT score + action list

HOW TO USE IT

Drop a transcript, get the summary in seconds.

Campaign Results & Action History

MANAGE

WHAT IT DOES

Live tracking of all platform-initiated actions and their measurable impact.

Live view: Campaign Results & Action History

INPUTS

- Export PDF trigger

OUTPUTS

- PDF reports
- Historical action logs
- Performance lift summaries

HOW TO USE IT

Filter by date range and click Export PDF for a board-ready summary.

Weekly Auto-PDF Report

MANAGE

WHAT IT DOES

Auto-aggregates weekly brand performance into a PDF, emailed every Monday.

Live view: Weekly Auto-PDF Report

INPUTS

- Recipient list

OUTPUTS

- Branded weekly PDF in their inbox

HOW TO USE IT

Set the recipients once — InfoGenie ships the report every Monday morning.

Cross-Channel Report

MANAGE

WHAT IT DOES

Comparative analysis across multiple marketing platforms in one view.

Live view: Cross-Channel Report

INPUTS

- Connected ad + organic accounts

OUTPUTS

- Side-by-side channel comparison

HOW TO USE IT

Use to spot which channels are pulling their weight and which aren't.

WHAT IT DOES

Role-specific board-ready dashboards (CEO / CMO / CFO / COO).

Live view: C-Suite Executive Reports

INPUTS

- Role selection

OUTPUTS

- Executive PDF reports

HOW TO USE IT

Pick the role lens, click Generate, download the board-ready PDF.

WHAT IT DOES

Customisable reporting templates for agencies to present to clients under their own brand.

White-Label Reports

Replace InfoGenie's purple/navy palette, logo and footer with your own agency brand on every PPTX / PDF / XLSX export. Toggle on, set your colours, paste a logo, and every existing report regenerates in your brand. Preview live before applying.

Brand Profile ☐ Apply white-label to all exports

Agency / Brand name:

Footer text (overrides "Powered by InfoGenie"):

Primary colour (cover + headers):

Accent colour (footer line):

Body text colour:

Logo (PNG or JPG, max 256KB): No file chosen [Remove logo](#)

No logo uploaded.

☐ Hide "Powered by InfoGenie" line when no custom footer is set

[Reset to InfoGenie defaults](#)

Live view: White-Label Reports

INPUTS

- Logo + colours + cover content

OUTPUTS

- Branded PDF report

HOW TO USE IT

Upload your branding once — every report can be re-skinned in one click.

WHAT IT DOES

Generate and export multiple reports simultaneously for large accounts.

The screenshot shows the InfoGenie web application interface. At the top, there's a navigation bar with the InfoGenie logo and several menu items: 'Analyse', 'Create', 'Reach', 'Grow', and 'Manage'. The 'Manage' menu is currently selected. Below the navigation bar, there's a blue header section titled 'Bulk Reporting' with a sub-header 'REACH: BULK REPORTING'. The main content area is white and contains a form for uploading a CSV of URLs. The form has a 'Run name' field with the example text 'e.g. Cape Town agency prospects', a 'CSV file (one URL per row, max 500)' field with a 'Choose File' button and 'No file chosen' text, and a checkbox for 'Render every page in a real browser (slower, but works for JS-heavy SPAs)'. There is a green 'Start Batch' button and a note that 'PDFs use your White-Label brand profile if it's enabled.' Below the form, there's a message: 'No bulk runs yet. Upload a CSV above to get started.'

Live view: Bulk Reporting

INPUTS

- Account selection + report type

OUTPUTS

- Batch ZIP of PDFs

HOW TO USE IT

Select the accounts, click Generate — download the ZIP when ready.

WHAT IT DOES

Multi-client management and white-label reporting interface.

Live view: Agency Hub & Reports

INPUTS

- Client account configurations

OUTPUTS

- Branded client reports
- Multi-tenant dashboard

HOW TO USE IT

Add clients in Settings, then switch context using the client dropdown to manage their campaigns separately.

WHAT IT DOES

Technical SEO and site-health audits.

Live view: Technical Suite

INPUTS

- Run All Audits trigger

OUTPUTS

- Crawlability scores
- Index-readiness report
- Technical health grade

HOW TO USE IT

Click Run All Audits to execute the full technical sweep. Each finding includes a fix.

WHAT IT DOES

Manage collaborative spaces and team permissions.

Live view: Workspaces & Team

INPUTS

- Workspace + member invites

OUTPUTS

- Per-workspace data isolation + roles

HOW TO USE IT

Create a workspace per client or brand; invite the relevant team members.

WHAT IT DOES

Configuration panel for the entire platform.

Live view: Integrations & Settings

INPUTS

- API keys, AI model selection, account permissions

OUTPUTS

- Connected platform status
- Global system configuration

HOW TO USE IT

Connect Google Ads, Meta, TikTok, RapidAPI, OpenAI/Anthropic, HubSpot and other integrations from one screen.

Glossary

ICP

Ideal Customer Profile — the persona representing your most valuable buyer.

SERP

Search Engine Results Page — what Google returns for a query.

SoV

Share of Voice — your visibility relative to competitors in a channel.

CTR

Click-Through Rate — clicks divided by impressions.

ROAS

Return on Ad Spend — revenue generated per unit of ad spend.

CPC

Cost Per Click — average cost paid for each ad click.

CPA

Cost Per Acquisition — average cost to acquire a customer.

VoC

Voice of Customer — direct quotes and language from real users (often Reddit/reviews).

Win/Loss

Analysis of which competitor messages beat yours and why.

AI Citations

Mentions of your brand in answers from ChatGPT, Claude, Gemini, Perplexity etc.

Battle Plan

The 90-day prioritised execution roadmap InfoGenie generates after analysis.

Auto-Draft

AI-generated reply suggestion that matches your saved brand persona.

Tips, troubleshooting & support

Six rules of thumb that consistently get the best results from InfoGenie. Read them once and revisit when something feels off.

Always start with a fresh analysis

For best results, re-run the analysis whenever you change the target country or notice a major market shift. The dashboard, Battle Plan and competitor cards all derive from this single run.

Use ICP Studio before Reply Studio

Saving a brand persona in ICP Studio means every Reddit reply, ad and email draft will sound like your brand — not generic AI text.

Mix the Tone dropdown carefully

In Reply Studio, picking "Helpful Expert" wins on Reddit; "Bold & Punchy" wins on Twitter/X; "Empathetic" wins on community forums.

Counter This Message " a one-shot

When you click Counter This Message, InfoGenie creates a 3-step counter-strategy. Each step can be edited or rejected before launch.

Hard refresh after platform updates

If buttons appear unresponsive after we ship an update, do a hard refresh (Ctrl/Cmd + Shift + R). The cache buster forces a fresh JS load.

Check Settings !' Integrations weekly

API tokens for Google Ads, Meta, TikTok and RapidAPI can rotate or expire. The Settings panel shows the live status of each connection.

Need help?

Raise an issue from inside the app — the platform sends diagnostic context automatically so we can resolve it faster.
