Welcome to InfoGenie

InfoGenie is an autonomous marketing intelligence platform. Give it a website or an industry and within 60 seconds it maps the competitive landscape, identifies your real competitors, surfaces the messages winning against you, and ships a 90-day execution plan you can act on the same day.

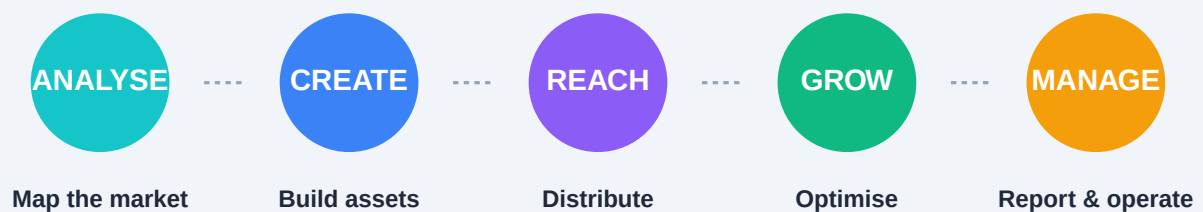

This manual covers every tool in the platform. Each module follows the same pattern: what it does, what to feed it, what you get back, and how to use it well. Read end-to-end the first time, then jump in via the table of contents.

How the platform works

Five stages compound on each other. Skipping one weakens the rest.

The InfoGenie Loop

Five stages that compound: each cycle sharpens the next.

Quick start
— your first
60 seconds

Get to your first insight in 60 seconds

1

Enter URL

Type your website (or pick an industry).

2

Choose country

Pick the market that matters for you.

3

Click Analyse Now

InfoGenie maps the market, finds 5+ real competitors and generates a full battle plan.

4

Review the dashboard

KPIs, competitor cards, traffic mix, and the 90-day roadmap appear automatically.

5

Take action

Click any "Counter This Message", launch a campaign, or push an audience to your ad accounts.

Analyse

Understand the market through competitor intelligence and search data.

9

TOOLS

-
- **Intelligence Report (Dashboard)**
High-level overview of the competitive landscape with AI-driven growth recommendations.
 - **Competitive Intelligence Engine**
Deep-dive analysis into specific competitors — traffic sources, threat levels, ad creative, and counter-attack plans.
 - **Intelligence Hub**
Real-time monitoring of competitor signals and predictive market moves.
 - **Battle Plan**
Strategic execution roadmap tailored to the identified market gaps.
 - **Reddit & Community Intelligence**
Monitors brand and competitor mentions across Reddit to surface sentiment and engagement opportunities.
 - **ICP Studio**
Builds detailed Ideal Customer Profiles using voice-of-customer signals.
 - **Search Intent Map**
Classifies keywords by user intent (Informational, Transactional, Commercial, Navigational).
 - **Keyword–Page Map**
Maps primary and supporting keywords to specific pages to avoid SEO cannibalisation.
 - **Google Search Intelligence**
Live Google SERP tracker for any query, country, and result type.
-

Analyse — features in detail

Understand the market through competitor intelligence and search data.

Intelligence Report (Dashboard)

ANALYSE

What it does

High-level overview of the competitive landscape with AI-driven growth recommendations.

Inputs

- Website URL or industry/sector
- Target country

Outputs

- KPI grid (CTR, ROAS, traffic)
- Side-by-side performance charts
- 12-month traffic & spend trends
- Competitor intelligence summary

How to use it

Enter your website or pick an industry on the home screen, choose your target country, and click "Analyse Now". The dashboard populates within 60 seconds.

Competitive Intelligence Engine

ANALYSE

What it does

Deep-dive analysis into specific competitors — traffic sources, threat levels, ad creative, and counter-attack plans.

Inputs

- Manual competitor URLs (optional)

Outputs

- Competitor cards
- Threat-level scoring
- Ad creative insights
- "Attack Plan" per competitor

How to use it

Open the Competitors view after running an analysis. Click any competitor card to drill into their channel mix and see the recommended counter-strategy.

Intelligence Hub

ANALYSE

What it does

Real-time monitoring of competitor signals and predictive market moves.

Inputs

- Auto-derived from analysis

Outputs

- Predictive signals
- Budget-shift alerts
- 90-day domination roadmap
- Exportable report

How to use it

Open the Intelligence Hub from the Analyse menu. Use "Counter This Message" on any competitor message to launch a counter-campaign in one click.

Battle Plan

ANALYSE

What it does

Strategic execution roadmap tailored to the identified market gaps.

Inputs

- Competitor analysis results

Outputs

- Implementation steps
- 90-day strategic priorities
- Tactical playbook

How to use it

Generated automatically after an analysis run. Review priorities top-to-bottom and assign owners.

Reddit & Community Intelligence

ANALYSE

What it does

Monitors brand and competitor mentions across Reddit to surface sentiment and engagement opportunities.

Inputs

- Brand or query string
- Scan Now trigger

Outputs

- Subreddit mentions with sentiment
- AI-suggested replies in your brand voice

How to use it

In the Reddit Intel view, click "Scan now" and wait ~10 seconds. Use the Reply Studio tab to draft on-brand responses.

ICP Studio

ANALYSE

What it does

Builds detailed Ideal Customer Profiles using voice-of-customer signals.

Inputs

- Brand intelligence data
- Optional manual prompts

Outputs

- Persona profiles (demographics, pains, motivations)
- Tile-level activations: ads, social, email

How to use it

Click any ICP tile to activate that channel. Use "Save ICP" to lock in the persona for future runs.

Search Intent Map

ANALYSE

What it does

Classifies keywords by user intent (Informational, Transactional, Commercial, Navigational).

Inputs

- Generate Intent Map trigger

Outputs

- Keyword !' intent mapping
- Landing-page-type recommendations

How to use it

Open the Intent Map view and click "Generate". Use the resulting clusters to plan content type per topic.

Keyword–Page Map

ANALYSE

What it does

Maps primary and supporting keywords to specific pages to avoid SEO cannibalisation.

Inputs

- Generate Map trigger

Outputs

- Visual site architecture
- Keyword !' URL assignments

How to use it

Click "Generate Map" to scan your site and assign each keyword cluster to the best-fit page.

What it does

Live Google SERP tracker for any query, country, and result type.

Inputs

- Search query
- Country
- Type (Organic / News)

Outputs

- Live ranking positions
- Competitor ad presence
- Organic visibility

How to use it

Type a query, choose a country, choose Organic or News, and hit Search.

Create

Build and manage marketing assets and campaigns.

5

TOOLS

-
- **Brand Creative Library**
Centralised repository for all brand-related files (logos, banners, social, video, PDFs).
 - **AI Creative Generation Engine**
Generates high-performing ad copy and headlines based on competitor data.
 - **Campaign Intelligence**
AI-generated campaign improvements and structural recommendations with one-click launch.
 - **Content Intelligence**
Identifies content gaps and audits existing pages for SEO performance.
 - **Social Calendar & Generator**
End-to-end social media management — generate posts, schedule, and visualise.
-

Create — features in detail

Build and manage marketing assets and campaigns.

Brand Creative Library

CREATE

What it does

Centralised repository for all brand-related files (logos, banners, social, video, PDFs).

Inputs

- File uploads up to 50MB (JPG/PNG/GIF/WebP/MP4/MOV/PDF/SVG)
- Category tags

Outputs

- Searchable asset grid
- Filter by type

How to use it

Drag and drop files into the Brand Assets uploader, then tag by category for fast retrieval.

AI Creative Generation Engine

CREATE

What it does

Generates high-performing ad copy and headlines based on competitor data.

Inputs

- Competitor intel
- Generate More trigger

Outputs

- Ad copy variants
- Headline options
- Campaign briefs

How to use it

Open AI Creative, select the competitor and channel, and click Generate. Iterate until you hit the angle you want.

Campaign Intelligence

CREATE

What it does

AI-generated campaign improvements and structural recommendations with one-click launch.

Inputs

- Launch modal: budget, platform, region

Outputs

- Automated deployment to Google, Meta, TikTok

How to use it

Click Launch Campaign on any recommendation to push the campaign live to your connected ad accounts.

Content Intelligence

CREATE

What it does

Identifies content gaps and audits existing pages for SEO performance.

Inputs

- Analyse Content trigger
- Page URLs

Outputs

- Topical cluster maps
- Content-gap reports
- AI page audits

How to use it

Click "Analyse Content" to scan your site. Drill into each gap to see suggested article briefs.

What it does

End-to-end social media management — generate posts, schedule, and visualise.

Inputs

- Create Post trigger (text/images)

Outputs

- Visual calendar
- Scheduled posts across platforms

How to use it

Use Create Post to draft content, set a publish time, and approve. Posts appear in the Master Calendar.

Reach

Distribute content and ads to target audiences.

2

TOOLS

-
- **Audience Intelligence**
Identifies and targets high-converting audience segments.
 - **Multi-Channel Advertising Hub**
Management interface for lead-generation ads across 20+ channels.
-

Reach — features in detail

Distribute content and ads to target audiences.

Audience Intelligence

REACH

What it does

Identifies and targets high-converting audience segments.

Inputs

- Auto-Target trigger

Outputs

- Defined audience segments
- Targeting parameters for ad platforms

How to use it

Click Auto-Target to let InfoGenie build your top 5 segments automatically. Push them straight to Meta, Google, or TikTok.

Multi-Channel Advertising Hub

REACH

What it does

Management interface for lead-generation ads across 20+ channels.

Inputs

- New Campaign trigger
- Platform connections

Outputs

- Integrated campaign management
- Cross-platform performance tracking

How to use it

Connect your ad accounts in Settings, then use New Campaign to launch coordinated buys across selected platforms.

Grow

Optimise visibility and measure long-term performance.

5

TOOLS

-
- **AutoSEO Pro**
Automated SEO execution — article generation, on-page fixes, and backlink tracking.
 - **AI Visibility Intelligence**
Tracks how your brand is cited by LLMs (ChatGPT, Claude, Gemini, Perplexity).
 - **AI Audit Suite**
Independent deep-dive audits for various AI performance metrics.
 - **Action Center**
Marketing-command view showing upcoming launches and system risks.
 - **KPI Tracker**
Long-term performance tracking against business goals.
-

Grow — features in detail

Optimise visibility and measure long-term performance.

AutoSEO Pro

GROW

What it does

Automated SEO execution — article generation, on-page fixes, and backlink tracking.

Inputs

- WordPress credentials (API)
- Target keywords

Outputs

- Published articles
- Backlink reports
- Keyword research

How to use it

Connect WordPress in Settings, choose target keywords, and let AutoSEO publish optimised articles on a schedule.

AI Visibility Intelligence

GROW

What it does

Tracks how your brand is cited by LLMs (ChatGPT, Claude, Gemini, Perplexity).

Inputs

- Run AI Audit trigger

Outputs

- Citation tracking
- Brand sentiment in AI responses
- Optimisation recommendations

How to use it

Click Run AI Audit. The dashboard shows where you appear (and where you don't) in AI answer engines.

AI Audit Suite

GROW

What it does

Independent deep-dive audits for various AI performance metrics.

Inputs

- Audit selection (Prompt Coverage, Entity Mapping, etc.)

Outputs

- Reports on answer accuracy, AI Overviews, citation-to-traffic attribution

How to use it

Pick the audit type and click Run. Reports save to the Action Center for follow-up.

Action Center

GROW

What it does

Marketing-command view showing upcoming launches and system risks.

Inputs

- Refresh trigger

Outputs

- Live status feed
- Upcoming milestones
- Optimisation opportunities

How to use it

Visit daily as your single pane of glass. Click any item to jump to the relevant module.

What it does

Long-term performance tracking against business goals.

Inputs

- Data from connected ad/analytics accounts

Outputs

- Growth trend visualisations
- Goal-completion charts

How to use it

Set your goals once, then check progress weekly. Anomalies are flagged automatically.

Manage

Operations, reporting, and platform configuration.

8

TOOLS

-
- **Master Calendar**
Unified view of all scheduled marketing activities — campaigns, content, social.
 - **Campaign Results & Action History**
Live tracking of all platform-initiated actions and their measurable impact.
 - **Re-Engage**
Tools for customer retention and win-back campaigns.
 - **Automations**
Workflow builder for connecting different parts of the marketing stack.
 - **Agency Hub & Reports**
Multi-client management and white-label reporting interface.
 - **C-Suite Executive Reports**
Role-specific board-ready dashboards (CEO, CMO, CFO, COO).
 - **Technical Suite**
Technical SEO and site health audits.
 - **Integrations & Settings**
Configuration panel for the entire platform.
-

Manage — features in detail

Operations, reporting, and platform configuration.

Master Calendar

MANAGE

What it does

Unified view of all scheduled marketing activities — campaigns, content, social.

Inputs

- Auto-sync from other modules

Outputs

- Global timeline of marketing operations

How to use it

Open Master Calendar to see every scheduled action. Click any item to edit in its source module.

Campaign Results & Action History

MANAGE

What it does

Live tracking of all platform-initiated actions and their measurable impact.

Inputs

- Export PDF trigger

Outputs

- PDF reports
- Historical action logs
- Performance lift summaries

How to use it

Filter by date range and click Export PDF for a board-ready summary.

Re-Engage

MANAGE

What it does

Tools for customer retention and win-back campaigns.

Inputs

- Customer data segments

Outputs

- Re-engagement campaign automation

How to use it

Upload or pull a customer list, choose a segment, and launch a re-engagement sequence.

Automations

MANAGE

What it does

Workflow builder for connecting different parts of the marketing stack.

Inputs

- Trigger / Action definitions

Outputs

- Cross-platform automated workflows

How to use it

Pick a trigger (e.g. competitor budget surge) and link it to an action (e.g. increase Meta bids).

Agency Hub & Reports

MANAGE

What it does

Multi-client management and white-label reporting interface.

Inputs

- Client account configurations

Outputs

- Branded client reports
- Multi-tenant dashboard

How to use it

Add clients in Settings, then switch context using the client dropdown to manage their campaigns separately.

C-Suite Executive Reports

MANAGE

What it does

Role-specific board-ready dashboards (CEO, CMO, CFO, COO).

Inputs

- Role selection

Outputs

- Executive PDF reports
- High-level business impact summaries

How to use it

Pick the role lens, click Generate, and download the board-ready PDF.

Technical Suite

MANAGE

What it does

Technical SEO and site health audits.

Inputs

- Run All Audits trigger

Outputs

- Crawlability scores
- Index-readiness report
- Technical health grade

How to use it

Click Run All Audits to execute the full technical sweep. Each finding includes a fix.

Integrations & Settings

MANAGE

What it does

Configuration panel for the entire platform.

Inputs

- API keys, AI model selection, account permissions

Outputs

- Connected platform status
- Global system configuration

How to use it

Connect Google Ads, Meta, TikTok, RapidAPI, OpenAI/Anthropic, and other integrations from one screen.

Glossary

ICP

Ideal Customer Profile — the persona representing your most valuable buyer.

SERP

Search Engine Results Page — what Google returns for a query.

SoV

Share of Voice — your visibility relative to competitors in a channel.

CTR

Click-Through Rate — clicks divided by impressions.

ROAS

Return on Ad Spend — revenue generated per unit of ad spend.

CPC

Cost Per Click — average cost paid for each ad click.

CPA

Cost Per Acquisition — average cost to acquire a customer.

VoC

Voice of Customer — direct quotes and language from real users (often Reddit/reviews).

Win/Loss

Analysis of which competitor messages beat yours and why.

AI Citations

Mentions of your brand in answers from ChatGPT, Claude, Gemini, Perplexity etc.

Battle Plan

The 90-day prioritised execution roadmap InfoGenie generates after analysis.

Auto-Draft

AI-generated reply suggestion that matches your saved brand persona.

Tips, troubleshooting & support

Six rules of thumb that consistently get the best results from InfoGenie. Read them once and revisit when something feels off.

Always start with a fresh analysis

For best results, re-run the analysis whenever you change the target country or notice a major market shift. The dashboard, Battle Plan and competitor cards all derive from this single run.

Use ICP Studio before Reply Studio

Saving a brand persona in ICP Studio means every Reddit reply, ad and email draft will sound like your brand — not generic AI text.

Mix the Tone dropdown carefully

In Reply Studio, picking "Helpful Expert" wins on Reddit; "Bold & Punchy" wins on Twitter/X; "Empathetic" wins on community forums.

Counter This Message " a one-shot

When you click Counter This Message, InfoGenie creates a 3-step counter-strategy. Each step can be edited or rejected before launch.

Hard refresh after platform updates

If buttons appear unresponsive after we ship an update, do a hard refresh (Ctrl/Cmd + Shift + R). The cache buster forces a fresh JS load.

Check Settings !' Integrations weekly

API tokens for Google Ads, Meta, TikTok and RapidAPI can rotate or expire. The Settings panel shows the live status of each connection.

Need help?

Raise an issue from inside the app — the platform sends diagnostic context automatically so we can resolve it faster.
